..... कहते रही, यह त्रकारी बात नहीं सनेगा

स्पष्टता, आत्मविश्वास, विषय की अच्छी पकड़ और प्रभावशाली भाषा में अपने विचारों और भावनाओं को व्यक्त करना ही संप्रेषण कला है जो निरंतर अभ्यास से निखारी जां सकती है। एक दिन में कोई अच्छा वक्ता नहीं बन सकता तथा भाषा पर अनायास ही किसी की पकड़ नहीं हो पाती। इसी अभ्यास के बल पर स्वामी विवेकानंद ने जिस संप्रेषण कला का विकास किया था, उसने अमेरिकावासियों को चकित और मोहित कर दिया था। स्वामी जी का यही गुण आज के युवाओं के लिए आदर्श है और इसी गुण के बल पर वे साक्षात्कार एवं अन्य परीक्षाओं में उल्लेखनीय सफलता प्राप्त कर सकते हैं। संप्रेषण में यदि थोड़ा हास्य-व्यंग्य मी शामिल हो तो संग्रेषण कला और अधिक प्रभावशाली और धारदार हो जाती है।

आज के समय में हिंदी के साथ—साथ अंग्रेजी माषा पर भी प्रभावशाली नियंत्रण किसी भी क्षेत्र में सफलता प्राप्त करने के लिए आवश्यक हो गया है। मले ही आपके पास उच्च कोटि की डिग्री हो, किंतु यदि आपका लिखित और बोलचाल की अंग्रेजी और हिंदी पर अधिकार नहीं है तो आपकी उन्नति और रोजगार की संभावनाए नहीं है। जो विद्यार्थी अंग्रेजी और हिन्दी के लेखन, पठन और भाषण में दक्ष हैं, वे हर प्रतियोगिता में अन्य प्रत्याशियों की तुलना में लाभ की स्थिति में रहते हैं। संप्रेषण कला में दक्ष होने के लिए आपको कठिन परिश्रम करना ही होगा। स्मरण रखिए कि सीखने की कोई उम्र नहीं होती।

56. पहले अनुच्छेद का कथ्य क्या है?

- (1) आत्मविश्वास
- (2) संप्रेषण
- (3) विवेकानंद
- (4) सफलता

57. 'सीखने की कोई उम्र नहीं होती' का अर्थ हैं-

- (1) एक उम्र विशेष में ही सीखा जा सकता है।
- (2) एक उम्र तक ही सीखा जा सकता है।
- (3) जीवन भर सीखा जा सकता है।
- (4) लंबी उम्र तक सीखा जा सकता है।

58. उपर्युक्त गद्यांश मुख्यतः किस को सम्बोधित कर रहा है?

- (1) शिक्षकों को
- (2) युवाओं को
- (3) अभिभावकों को
- (4) स्त्रियों को

#### 51-55. Read the following passage and answer the questions 51 to 55 that follow.

The Mayan Indians lived in Mexico thousands of years before the Spanish arrived in the 1500s. The Maya's were an intelligent, culturally rich people whose achievements were many. They had farms, beautiful places, and cities with many buildings. The Maya's knew a lot about nature and the world around them. This knowledge helped them to live a better life than most people of that time, because they could use it to make their lives more comfortable and rewarding. Knowledge about tools and farming, for instance, made their work easier and more productive.

The Maya's believed in many gods, including rain god, sun god and corn god. They built large temples to honour their gods. Skilful workers built cities around these temples. It was difficult for them to construct these cities because they had no horses to carry the heavy stones they used to build with. Workers had to carry all of the building materials themselves. Today, many of these ancient Mayan cities and temples are still standing.

Although the cities that the Maya's built were beautiful and the people worked hard to build them, very few of the people lived in them. Usually, only the priests lived in the cities. The other people lived in small villages in the forest. Their houses were much simpler than the elaborate structures in the cities. They lived in small huts with no windows. The walls were made of poles covered with dried mud, and the roof was made of grass or leaves. Most Maya's lived a simple life close to nature.

The Mayan priests studied the sun, moon, stars and planets. They made a calendar from what they learned. The year was divided into 18 months of 20 days each with five days left over. The Mayan calendar was more accurate than the European calendars of the time.

Around the year 800, the Maya's left their villages and beautiful cities, never to return. No one knows why this happened. They may have died from an infectious disease. They may have left because the soil could no longer grow crops. Archaeologists are still trying to find the lost secrets of the Maya's. They are still one of the our greatest mysteries.

Read the following passage and answer the questions 56 to 60 that follow: One day, a Brahmin by the name of Sevaram asked Birbal for help. He said that his ' forefathers had been great Sanskrit scholars and that people used to respectfully refer to them as 'Panditji'. He said that he had no money nor need for wealth; he was content living a simple life but he had just one wish. He wished people would refer to him as 'Panditji'. He asked Birbal how he could achieve this. 1 Birbal said that the task was fairly simple if the Brahmin were to follow his advice. word for word, for the realisation of his aspirations. Then Birbal advised the Brahmin to shout at the any one who would call him 'Panditji' from then on. Now the children who lived on the same street as the Brahmin, did not like him since he often scolded them. They were just waiting for an opportunity to get back at him.

Birbal told the children that the Brahmin would get really irritated about their calling him 'Panditji'. The children then started calling him 'Panditji' and the Brahmin, as advised by Birbal, would shout at them. The children spread the word to all the other children in the neighbourhood that Sevaram hated being called 'Panditji'. Thus, finally everyone started calling him 'Panditji'.

81-85. Read the following passage and answer the questions that follow:

Rohit gets ready for his job interview. He takes a shower, shaves, brushes his teeth and clips his fingernails. Then he combs his hair and puts on the new suit he bought just for the day. Rohit feels confident but at the same time he is also very nervous. Here is why. Rohit graduated at the top of his class in college. Still, he is aware that the economy of the country is bad. His father lost his job at the bank just a few weeks ago! Furthermore, many people are being interviewed for the same job and there is a lot of competition. But Rohit is still positive. He thinks he has a good chance of getting the job at the technology company.

Rohit arrives at the interview venue at 9:45. In fact he is 15 minutes early. "Have a seat. Mr. Quraishi will be with you right away," the receptionist says. "You will be called in as soon as he is free."

Rohit sits down, thinking about his preparation for the interview. He recalled some of the things he ought to do. Particularly that he should look people in the eye, give a firm handshake and speak clearly. He feels pretty ready. "Mr. Quraishi is ready to see you now," the receptionist says. Rohit takes a deep breath and walks into Mr. Quraishi's office.

"Good morning, sir," Rohit said.

## 86-90' Read the following passage and answer the questions that follow:

For centuries, people have been playing kicking games with a ball. The game of football developed from some of these early games. The English gave the game its first set of rules in 1863. In football, two teams of eleven players each, try to kick to finally head the ball into their opponents' goal. The goalie, as the goalkeeper is often called, tries to keep the ball out of the goal, and he is the only player on the field who is allowed to handle the ball with his hands. The other players can only use their feet, heads and bodies to control the ball.

In European countries, football is also called 'association football', while in America, it is commonly known as Soccer. Some people believe that the word "Soccer" is a derivation from the word 'association'. While others think that the name came fromthe high socks that the players wore for playing the game.

Brazil is the home of many great football players, including one of the most famous players of all times, Pele. Pele played for many years in Brazil and later in New York.

मैं जंगल में कभी हथियार लेकर नहीं गया और न ही मेरे पास कोई हथिया है। मैंने कभी ऐसा महसूस नहीं किया कि वन्य प्राणियों के अध्ययन के लिए जंगल मे हथियार लेकर जाना चाहिए। वैसे जंगल में हाथी और भालू ज्यादा खतरनाक होते हैं। एक बार मैं और नरेश कॉर्वेट-नेशनल पार्क में शूटिंग कर रहे थे। जैसे है हाथियों को हमारी गंध मिली तो हाथियों के समूह का मुखिया नर-हाथी जोर रं चिंघाड़ा और सभी हाथी भाग खड़े हुए। पर एक हथिनी हमारी और बढ़ने लगी संयोग से एक मोरनी रास्ते में अंडे दे रही थी। हथिनी को आते देख मोरनी ने अपने पंख फड़फड़ाए और हथिनी चुपचाप वापस लौट गई।

पक्षी विज्ञान से संबंधित जितनी विचित्र बातें हैं उनमें सबसे ज्यादा अजीब है पक्षियों का एक देश से उड़कर दूसरे देश को जाना और फिर लौटना, अर्थात् कुछ समय के लिए उनका प्रवास। यह अजीब बात अब भी रहस्य बनी हुई है। साल में दो बार, बसंत और पतझड़ में, लाखों चिड़ियाँ किसी सुनिश्चित स्थान पर पहुँचने के लिए लंबी यात्रा करती हैं, कमी–कमी वे महाद्वीप और महासागर तक पार करती हैं।

चिड़ियों के इस प्रवास की खास बात यह है कि इन दोनों स्थानों के बीच उनका आवागमन बिल्कुल नियमित होता है। उनकी यात्राओं की मविष्यवाणी तक की जा सकती है जिसमें एक हफ्ते या उससे कम का ही आगा—पीछा हो सकता है। चिड़ियाँ लौटकर उन्हीं क्षेत्रों, प्रायः उसी बाग अथवा खेत में आ जाती हैं। ये ही उनके गर्मी और जाड़े के निवास होते हैं और उनके बीच, हो सकता है, कई हजार मील तक का फासला हो।

(3) आने और जाने के समय में कम ही अन्तर होता है।

(4) जाने का समय निश्चित होता है।

79. चिडियों के प्रवास से संबंधित कौन सी बात सही नहीं है?

(1) उनकी यात्राओं की भविष्यवाणी की जा सकना।

(2) उनका हजारों मील दूर जाना।

(3) आवागमन नियमित होना।

(4) चिड़ियों को उड़ना हमेशा अच्छा लगता है।

पक्षी विज्ञान के लिए कौन सी बात अभी तक रहस्य बनी हुई है?
