Computer Knowledge

1. Which of the following measure(s) is/are used to determine the quality of a printer ____. a) Dots printed in a minute b) Dots per Inch c) Dot-Per-Square-Inch d) All of the Above _____ is the mode we use to execute the instruction from a computer. 2. a) Sequential d) None of the above b) Parallel c) Both (a) & (b) Modern computers are reliable but they don't have _____. 3. d) Self thinking b) Powerful a) Fast c) Cheap What is meant by devoted computer _____. 4. a) Which uses only one kind of software b) Which is used by only one person c) Which is assigned with only one task d) No such type of computers are available 5. The system unit of a personal computer typically contains all of the following except? a) Microprocessor b) Disk Controller c) Serial interface d) Modem A computer program that converts an entire program into a machine language is 6. called _____. b) Simulator c) Compiler a) Interpreter d) None of the above A computer program that converts one by one instruction into a machine language is 7. called _____. a) Interpreter b) Simulator c) Compiler d) None of the above _____ is an internet based computing solution where shared resources are provided. 8. a) Cloud Computing b) Networking c) LAN d) None of the above _____ is the language that computer can understand and execute. 9. b) Machine Level Language a) Middle Level Language c) High Level Language d) All of the above

10.	10 is a set of instructions, also called a program that tells a computer how to						
	perform tasks.						
	a) Hardware	b) Software	c) Both (a) and (b)	d) None of the above			
11.	Router is	device.					
	a) Input	b) Output	c) Both (a) and (b)	d) None of the above			
12.	12. Scanner is device.						
	a) Input	b) Output	c) Both (a) and (b)	d) None of the above			
13.	The building b	lock for all informa	tion that flows through a	computer			
	a) Bit	b) Byte	c) Both (a) and (b)	d) None of the above			
14.	is the soft	tware that controls a	all the other software prog	grams and allows to			
	perform basic t	asks.					
	a) Software	b) Hardware	c) Windows	d) Operating System			
15.	The following	is termed as p	ermanent memory.				
	a) Random Acc	cess Memory	b) Read Only Memory				
	c) Flash Memo	ry	d) Cache Memory				
16.	16. Memory that temporarily stores data and that can be erased or changed is known as						
	a) Cache Memo	ory	b) Read Only Memory				
	c) Flash Memo	ry	d) Random Access Memory				
17.	17. Information that is entered into a computer is called as						
	a) Innut	b) Output					
	a) input	b) Output	c) Both (a) and (b)	d) None of the above			
10							
18.	Information that	a computer produ	ces and delivers back to th	ne user is known as			
18.	Information that	a computer produ		ne user is known as			
	Information that	ut a computer produ b) Output	ces and delivers back to th	ne user is known as			
	Information tha a) Input MP3 player is	ut a computer produ b) Output	ces and delivers back to th	ne user is known as d) None of the above			
19.	Information tha a) Input MP3 player is a) Input device	at a computer produ b) Output 	ces and delivers back to th c) Both (a) and (b)	ne user is known as d) None of the above			

21. After copying the content, how many times can you paste						
a) Only one time b)	b) Two times					
c) Three times d)	d) Many times					
22. What is the keyboard shortcut k	22. What is the keyboard shortcut key to merge a document					
a) Alt+Shift+N b) Alt+Shift+O	c) Alt+Shift+P	d) Alt+Shift+Q				
23. In a table to move to the first ce	ell in a row, is t	the keyboard shortcut key.				
a) Alt+Tab b) Alt+Shift	c) Alt+Ctrl	d) Alt+Home				
24. To find text, formatting and spe	cial items is th	e keyboard short key.				
a) Ctrl+g b) Ctrl+h	c) Ctrl+f	d) Ctrl+a				
25. What is the shortcut key to disp	lay the 'save as' dial	og box				
a) F8 b) F12	c) F11	d) F9				
26. Among the following is a	26. Among the following is a logical function.					
a) Average b) Count	c) ABS	d) AND				
27. Of the following is correct synt	ax in excel?					
a) REPLACE (old-text, num-chars	s, Start-num, New-te	xt)				
b) REPLACE (old-text, Start-num, num-chars, New-text)						
c) REPLACE (old-text, New-text, num-chars, Start-num)						
d) REPLACE (num-chars, Start-nu	um, old-text, New-te	ext)				
28. Which of the following is corre	ct					
a) Frequency (data-array, bins array) b) Frequency (data, bins)						
c) Frequency (data, bins array)	d) Freque	ncy (array, bins array)				
29. Without the symbol '=' excel will treat the data as						
a) Number b) Formula	c) Text	d) None of the above				
30. False () function						
a) Returns the logical value of f	false b) Returns	s the logical value of true				
c) Returns the actual value	d) None o	f the above				

31. A group of computers connected together through a central sever using cables and						
other con	nmunication dev	vices is known as				
a) Netwo	ork b) LAN	c) WAN	d) None of the above			
32. All types	of banking tran	sactions performed e	electronically without manual operation			
is knowr	as					
a) E-Ban	king	b) Computerizat	ion			
c) Mode	mization	d) None of the a	bove			
33. Banks us	e computers for					
a) Track	customer inform	b) I	Process the loan application			
c) Track	the credit card in	nformation d) A	All of the above			
34. Measurii	ng unit of capaci	ty of hard drive is				
a) GB	b) GHz	c) MHz	d) None of the above			
35. Web add	ress is a unique	address to identify _	on web.			
a) Brows	er b) Websi	te c) Link	d) All of the above			
36. In a netv	ork, the comput	er that stores the file	s and processes the data is named as?			
a) Termi	hal b) Mode	m c) Server	d) None			
37. In proces	ssing of cheques	which of the follow	ing technology is helpful to the banks?			
a) OMR	b) Barco	de c) MICR	d) OCR			
38. The com	puter code for in	terchange of inform	ation between terminals is			
a) ASCII	b) ACSI	c) ASICI	d) ASIIC			
39. Of the fo	39. Of the following, is different from the group.					
a) Windo	ows b) MS-W	Vord c) MS-Ex	cel d) MS-PowerPoint			
40. Of the fo	llowing, is	not a computer lang	guage.			
a) MS-W	Vord b) C++	c) COBO	L d) BASIC			
41. A collect	ion of related re-	cords in a database				
a) Field	b) File	c) Both (a) and	(b) d) None of the above			

42. VIRUS stands for _____.

- a) Virtual Information Resource Under Siege
- b) Vital Information Recourse Under Sage
- c) Virus Information Recourse Under Siege
- d) Vital Information Recourse Under Siege
- 43. _____ is known as restricting the access to information.
- a) Decryption b) Encryption c) Hacking d) None of the above 44. _____ is known as allowing the authorized access to information. a) Decryption b) Encryption c) Hacking d) None of the above 45. _____ is known as unauthorized access to the system. a) Decryption b) Encryption d) None of the above c) Hacking 46. _____ are the examples of pointing devices. a) Electronic Mouse b) Pointing Stick c)Track ball d) All of the above 47. The device that is used to read bar codes is _____. a) OMR b) Barcode c) MICR d) OCR
- 48. Nano Second is the _____.
 - a) Millionths of a second
 - b) Billionths of a second
 - c) Trillionth of a second
 - d) Thousands of a second

49. Of the following, _____ would be considered as a way through which a computer virus can enter into a computer system.

- a) E-mail with attachments
- b) Downloading the data from sites
- c) Operating the system without antivirus software
- d) All of the above

50. _____ is known as a computer network in which one centralized, powerful computer is a hub to which many less powerful personal computers or workstations are connected. The clients run programs and access data that stored on the server.

a) Client-Server network	b) Extranet	c) Internet	d) None of the above.
