L&T Infotech HR Interview Questions with Answers

1. Three qualities to be a successful engineer?

While answering this question be sure that the qualities you mention reflect you. For example, you can begin the answer by saying that according to you "Curiosity, Creativity, Problem Solving" will enable any aspiring individual to become a successful engineer. If you want you can also explain the individual characteristics of why you think only these three will help you become a successful engineer. Make sure you reflect the interviewer on how you have all these qualities and make him think that you are a perfect fit for the organization. Copyright to: <https://www.freshersnow.com/>

2. Why do you want to work for this organization?

You can answer this question by saying that you like the company's work culture, work ethics, the employee retention policy they follow, work-life balance, the success it has achieved in the past 5 years. Convey to the interviewer about how much you want to be part of their success team and want to contribute your share of knowledge for its betterment. The passion with which you speak about the company will show the keen interest you are having to join the organization.

3. What motivates you to do good work?

Don't just give generic answers like you want to make your parents proud and that is the motivation to do good work. That may be true and genuine but to be different from others one has to think out of the box all the time. For example - Try to be creative by saying that you believe in the Japanese concept of Ikigai which means which gives your life worth, meaning, or purpose. When you surely know that you will be the beneficial one at the end then you will treat your work as invaluable and try to do things that don't decimate its value.

4. What are your career options right now?

The interviewer will be wanting to know what are the aspirant's career plans right now. Whether being an employee of L&T Infotech exists in their career plans or not. So, make sure you answer this question accordingly by saying that how you see yourself working for the benefit of the organization. And learning new things that can enable you to improve your work performance and efficiency. Copyright to: <https://www.freshersnow.com/>

5. Any questions for me?

The most basic thing that will be asked by the interviewer for the interviewee is if they have any questions for him. Don't say no just because you want to end this interview as soon as possible. By asking questions to the interviewer will show your eagerness to know new things and your willingness to get your doubt clarified. You can ask questions like "What technologies you can learn that can help you in your job", "Will you be given Accurate Training on your onboard", "What can I expect from the company for my professional growth". In this mode, you can ask questions to the interviewer and make a lasting impression.
