Passage - 1

That the global economy is slowing down is an understatement. This is more so when much of the world economic activity's fulcrum is oil. With oil prices falling below \$28 per barrel and set to drop further — some suggest they could fall as low as \$10 a barrel. The reason? Iran, a major oil producer, just free from sanctions imposed by the US, is all set to boost its crude output. The country has announced that it will increase its crude output by 500,000 barrels a day. With

this, the global crude oil market is set for a glut and consequent collapse in oil prices.

Experts point to China as one of the main reasons for the slow down. The dragon economy has become a drag on the global economy. Growth slowed down to 6.9 per cent after the fourth quarter slowed to 6.8 per cent last year. This was exacerbated by a huge outflow of capital, a slide in the Yuan currency and stock market crashes. With many of the markets riding piggyback on the Chinese economy, demand fell everywhere and impacted the world economy at large. The latest forecast by the International Monetary Fund (IMF) cut its global growth forecast for 2016 at 3.4 per cent, down 0.2 per cent but put India's projected growth at 7.5 per cent, up from 7.3 per cent last year. So, as the dragon slows down, it could be the time of the resurgent tiger, cranked up by low oil prices.

Passage - 2

Where would modern society be without advertising? Individual advertisers might think they are just trying to sell a particular product but advertising as a whole sells us an entire lifestyle. If it weren't for advertising the whole of society would be quite different. The economy, for instance, would be plunged into a crisis without the adverts and all the publicity that fuel our desire for limitless consumption. As John Berger observed in his book "Ways of Seeing", all advertising conveys the same simple message: my life will be richer, more fulfilling once I make the next crucial purchase. Adverts persuade us with their images of others who have apparently been transformed and are, as a result, enviable. The purpose is to make me marginally dissatisfied with my life - not with the life of society, just with my individual life. I am supposed to imagine myself transformed after the purchase into an object of envy for others - an envy which will then give me back my love of myself.

The prevalence of this social envy is a necessary condition if advertising is to have any hold on us whatsoever. Only if we have got into the habit of comparing ourselves with others and finding ourselves lacking, will we fall prey to the power of advertising. While fanning the flames of our envy advertising keeps us preoccupied with ourselves, our houses, our cars, our holidays and the endless line of new electronic gadgets that suddenly seem indispensable.
