Total	92 (Approx)	2 hours and 20 minutes

LSAT Syllabus

Reading Comprehension

It measures a candidate's ability to read, understand and give insights into passages. The questions asked in the passage will be related to the following characteristics.

- Principles that function in the selection
- The main idea or primary purpose
- The organization or structure
- Analogies to claims or arguments in the choice
- Information that is explicitly stated
- An author's attitude as revealed in the tone of a passage or the language used
- The application of data in the selection to a new context
- Information or ideas that can be inferred
- The meaning or purpose of words or phrases as used in the context
- The impact of more details on claims or arguments in the selection

Law School Admission Council (LSAC)

Analytical Reasoning

- Understanding what could be true or must be true from given facts and rules
- Recognizing when two statements are logically equivalent in context by identifying a condition or state that could replace one of the original conditions while still resulting in the same possible outcomes https://exams.freshersnow.com/
- Inferring what could be true or must be true from given facts and rules together with new information in the form of an additional or substitute fact or rule
- Comprehending the basic structure of a set of relationships by determining a complete solution to the problem posed (for example, an acceptable seating arrangement of all six diplomats around a table)
- Reasoning with conditional ("if-then") statements and recognizing logically equivalent formulations of such statements

Logical Reasoning

- Determining how additional evidence affects an argument
- Knowing the parts of a case and their relationships
- Detecting assumptions made by particular arguments
- Identifying explanations
- Recognizing similarities and differences between patterns of reasoning
- Reasoning by analogy
- Identifying and applying principles or rules
- Recognizing misunderstandings or points of disagreement
- Identifying flaws in arguments
- Drawing well-supported conclusions
