SECTION – II

ENGLISH INCLUDING COMPREHENSION

Questions 31 - 35 :

Read the passage below and answer the question that follow :

Modern civilization has some serious defects. In democratic countries men are equal before the law and have a voice in deciding how and by whom they shall be governed. But the sharing out of money – which means the sharing out of food and clothing and books and so on – is still very unfair while some people live in luxury, many have not enough to eat and drink and wear. Even in the finest of the world's cities thousands of people live in dreadful surroundings. There are many families of five and six person who live in a single room: they sleep, dress, wash and eat their meals in the same room: in the same room they are born and in the same room they die and they live like this not for live like this fun but because they are too poor to afford another room.

A still greater danger comes from war. Twice already in my life -time from 1914 to 1918 and from 1939 to 1945, almost whole of the world has been torn by war. Moreover, in the conditions of present day any war that starts anywhere is more and more likely to spread everywhere. What a still more tragic is that man has now discovered how to release for purposes of war the colossal forces locked up in the atom. The leading nations of the world are making bombs which if another war came, would certainly be widely used. Nobody knows what the effect of dropping an atom bomb on a large scale would be, but it is quite possible that the total destruction of civilization of the west, and even parts of the world might ensue.

Yet another great defect of civilization is that it does not know what to do with its knowledge. Science has given us powers fit for Gods yet we use them like small children. For example, we do not know how to manage our machines. Machines were made to be man's servants: yet so dependent on them that they are in a fair way to become his masters.

31. The characteristic feature of democracy is that
- People enjoy unrestricted freedom to do what they like
 - All the people belong to one party or another
 - People are equal in the eyes of law and they have a role to play in their appointment of their rulers
 - Government does everything for the people because they are equal
32. "Man has now discovered how to release for purposes of war the colossal forces locked up in the atom" means that
- Atomic power has dehumanized mankind
 - There are immense possibilities of man discovering new sources of powers of destruction
 - Destructive powers of immense proportion are stored up in the atoms
 - Man knows the secret of putting the atoms to the best use
33. What is quite possible if in future war atoms bombs are dropped on large scale?
- The nation will undergo untold suffering and misery
 - The nation that drops them on its enemy will itself engulfed in the destructive fold of war
 - The total destruction of the civilization of the west and even of other parts of the world might materialize
 - The leading nations of the world will realize the destructive capacity of atomic warfare and will come round to solve their disputes by negotiations
34. That there is unfair and uneven distribution of food and clothing and houses and so on is the drawbacks of
- The modern democracy
 - The modern socialistic system
 - The modern civilization
 - The constitutions of modern countries
35. Which of the following may be the most suitable heading of the above passage?
- Man and Machine
 - The curse of Science
 - Defects of Modern civilization
 - Atomic power for destruction or construction
