## SECTION –II

### ENGLISH

#### Question 36-40

Direction: Read the passage below and answer the questions that follow:

If the reason in region of thought is the aim of science, the rule of equality in the region of behavior is the aim of Democracy. Democracy is not the political arrangement or a form of government. It is a pattern of life, an active conviction which informs and inspires every thought word and deed. our present constitution of society induces in its more fortunate members far too great readiness to accept privilege as though it were inherent in the social order , as though it were normal and even proper and just.

If we are sincere in our professions of democracy we should not shut our eyes to the most obvious defects of the present social order. A system does not offer security and decent employment to multitudes of trained young men suffers from fundamental vice. Society is in the danger of splitting into pieces if the few who have the benefits of civilization are not willing to share with the rest. No state is attainable unless it procures for all its members the essentials of a good life. we acknowledge that health is better than disease, sufficiency better than poverty , shelter better than cold and exposure, ease of mind better than racking anxiety. It is our duty to obtain these essentials of civilized life for the mass of the population, to work for basic economic justice for all, if necessary by the imposition of higher taxes on incomes, land, value and inheritance. Riches were created by the maker for being spent on social purpose. It was Blackstone not Lenin who wrote: `` the law not only regards life and protects everyman in enjoyment of it, but also furnishes him with everything necessary for its support. For there is no man so indecent or wretched but that he may demand a supply sufficient for all the necessities of life from the more opulent part of community.
