ENGLISH INCLUDING COMPREHENSION

Direction: Questions (26 – 30), Read the passage carefully and answer the questions based on its contents and darken the circle.

In May 1966, the World Health Organization was authorized to initiate a global campaign to eradicate smallpox. The goal was to eradicate the disease in one decade. Because similar projects for malaria and yellow fever had failed, few believed that small-pox could actually be eradicated but eleven years after the initial organization of the campaign, no cases were reported in the field.

The strategy was not only to provide mass vaccinations, but also to isolate patients with active small-pox in order to contain the spread of the disease and to break the chain of human transmission. Rewards for reporting small-pox assisted in motivating the public to aid health workers. One by one, each small-pox victim was sought out, removed from contact with others and treated. Finding no other conveyance and no place to stay, Mr. and Mrs. Shah had to walk the distance of 3 miles at midnight. Facts : A, B and C decided to commit burglary. They broke into a locked house. However, a domestic servant appeared from the out-house before they had finished, and started shouting. A, B and C left the house and started running away. They were pursued by a small crowd. A,

on being caught by Z, one of the persons pursuing them, stabbed him and ran away. By that time B and C had disappeared. Z died on account of the stab wounds. Later the police could arrest all the three. They were charged for attempted burglary and murder of Z.
