	(1) a permission	(2)	a wish
	(3) a compulsion	(4)	an inference
$\epsilon$	(5) a companion		7

## Q. Booklet Code B

[For Q. No. 38-42] Read the following passage carefully and choose the correct answers to the questions given after it.

In bringing up children, every parent, regardless of ethnicity, income, education, or geographic location, watches eagerly the child's acquisition of each new skill. However, it is often tempting to hurry the child beyond his natural learning rate, which can set up dangerous feelings of failure and states of worry in the child. This might happen at any stage. A baby might be forced to use a toilet too early, a young child might be encouraged to learn to read before he knows the meaning of the words he reads. On the other hand, though, if a child is left alone too much, or without any learning opportunities, he loses his natural enthusiasm for life and his desire to find out new things for himself. Parents vary greatly in their degree of strictness towards their children. Some may be especially strict in money matters. Others are severed over times of coming home at night or punctuality for meals. In general, the controls imposed represent the needs of the parents and the values of the community as much as the child's own benefit.

- 38. According to the passage, in the process of children's fearning new skills, parents
  - (1) must encourage them to read before they know the meaning of the words they read.
  - (2) should achieve a balance between pushing them too hard and leaving them on their own.
  - (3) never expect too much of their children.
  - (4) should join them in schools after 20 years.
- 39. It is pointed out in the reading that
  - (1) parents should not give money to children.
  - (2) all parental restrictions are the same.
  - (3) parental restrictions vary, and are not always enforced for the benefit of the children alone.
  - (4) all parents ask their children to read before they know the meaning of the words they read.
- 40. As we understand from the passage, watching the child's acquisition of new skills
  - (1) is universal among parents.
  - (2) is not seen in most of the countries.
  - (3) is very dangerous to their health.
  - (4) will make them lose interest in learning new things.
- 41. Identify the true statement from the following:
  - (1) The child should be left alone too much.
  - 2) Parents don't bother about their children's learning.
  - (3) Some parents may be strict in punctuality for meals.
  - (4) The community has no values.
- 42. Choose the meaning of the word 'acquisition'.
  - (1) watching things

(2) playing with toys

(3) eating food
