answer the following questions:

.

	The angle between centripetal accelera				
	-A0° B. 45°	C.	90 ⁰		
2		D.	100°		
2	A particle having position vector of a particle in S.I units is $\vec{r} = 4t^2\hat{i} + 3t^2\hat{j} + 2t\hat{k}$, the acceleration of the particle will be :				
	A. 4 m /s ²	C.	$5 \mathrm{m/s^2}$		
	B. 10 m /s ²	D.	None of these		
3	A mortar shell is fired with the velocity of 10 m/s at an angle of 45°, Calculate range of shell				
	A. 9 m	C.	11.2 m		
	B. 10.2 m	D.	11.2 cm		
4 .	A rock is released from the top of a ver the rock travel in the first 7 seconds of	ry hig its fr	h cliff, approximately how far does ee-fall? (Assume no air friction.)		
	A. 120.05 m	C.	240.1 m		
	B. 60.2 m	D.	None of these		
5	If 'I' is the moment of inertia and 'E' is then its angular momentum will be				
	A. √(EI)	_	El		
	B. 2EI	D.	√(2EI)		
•	of the disc (in kgm²) A. 0.24	C.	0.16		
7		D. about	None of these its axis perpendicular to its plane over another disc of moment o		
7	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is passing through the passing the passing the passing through the passing through the passin	D. about blaced	0.16 None of these its axis perpendicular to its plane over another disc of moment o γ 'ω' about the same axis. The		
7	A. 0.24 B. 0.96 A round disc of moment of inertia l_2 and passing through its centre is primertia l_1 rotating with an angular ve	D. about blaced	0.16 None of these its axis perpendicular to its plane over another disc of moment o γ 'ω' about the same axis. The		
7	A. 0.24 B. 0.96 A round disc of moment of inertia l_2 and passing through its centre is prinertia l_1 rotating with an angular vertical angular velocity of the combination A. $l_2\omega/(l_1 + l_2)$ B. $l_1\omega/(l_1 + l_2)$	D about blaced blocity on of C. D.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of ' ω ' about the same axis. The discs is: ω $(1+t_2)$ ωH_1		
• •	A. 0.24 B. 0.96 A round disc of moment of inertia l_2 and passing through its centre is primertial l_1 rotating with an angular vertical angular velocity of the combination A. $l_2\omega/(l_1 + l_2)$ B. $l_1\omega/(l_1 + l_2)$ A particle moves with constant angular following:	D. about blaced elocity on of C. D.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of ' ω ' about the same axis. The discs is: ω $(l_1 \pm l_2)\omega/l_1$ mentum, what is true out of the		
•	A. 0.24 B. 0.96 A round disc of moment of inertia l_2 and passing through its centre is primertia l_1 rotating with an angular vertical angular velocity of the combination A. $l_2\omega/(l_1 + l_2)$ B. $l_1\omega/(l_1 + l_2)$ A particle moves with constant angular	D about blaced blocity on of C. D.	0.16 None of these its axis perpendicular to its plane I over another disc of moment of ' ω ' about the same axis. The discs is: ω $(1 \pm 1_2) \omega H_1$ mentular, what is true out of the		
• •	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁+ l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. 	D. about blaced elocity on of C. D. C.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of 'ω' about the same axis. The discs is: ω (l_1±l_2)ω/l_1 mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular vertial angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁+ l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decret volume will. 	D. about blaced blocity on of C. D. C.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of ' ω ' about the same axis. The discs is: ω $(1 \pm 1_2) \omega H_1$ mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is prinertia l₁ rotating with an angular version of the combination of the combination	D. about blaced elocity on of C. D. C.	0.16 None of these its axis perpendicular to its plane over another disc of moment of 'w' about the same axis. The discs is: ω $(l_1 \pm l_2) \omega A_1$ mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁ + l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decreval of an ideal gas i	D. about on of C. D. C. D. c.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of 'w' about the same axis. The discs is: ω $(1 \pm 1_2) \omega H_1$ mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its Increases by 9% None of these		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁ + l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decreval to the pressure of an ideal gas is decreval to the pressure by 11.1% 	D. about on of C. D. C. D. c.	0.16 None of these its axis perpendicular to its plane over another disc of moment of 'w' about the same axis. The discs is: ω (l_1±l_2)w/lt mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its Increases by 9% None of these f the gas, is equal		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁ + l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decreval of an ideal gas i	D. about on of C. D. C. D. c.	0.16 None of these its axis perpendicular to its plane over another disc of moment of 'w' about the same axis. The discs is: ω (1_±1_2)w/4 mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its Increases by 9% None of these f the gas, is equal		
3	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁ + l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decreased by 11.1% B. Increase by 10.1% Translational kinetic energy for one minimation. 	D. about blaced elocity on of C. D. C. D. eased C. D. c. D. c. D. c. D. c. D. c. D. c. c. D. c. c. D. c. c. c. c. c. c. c. c. c. c. c. c. c.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of 'w' about the same axis. The discs is: ω (1±12)w/4 mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its Increases by 9% None of these f the gas, is equal 3/2 kT ½ kT		
7 B 10	 A. 0.24 B. 0.96 A round disc of moment of inertia l₂ and passing through its centre is pinertia l₁ rotating with an angular verifinal angular velocity of the combination A. l₂ω/(l₁ + l₂) B. l₁ω/(l₁ + l₂) A particle moves with constant angular following: A. Torque will be non zero but constant. B. Torque will be zero. If the pressure of an ideal gas is decreased of a second seco	D. about blaced elocity on of C. D. C. D. eased C. D. c. D. c. D. c. D. c. D. c. D. c. c. D. c. c. D. c. c. c. c. c. c. c. c. c. c. c. c. c.	0.16 None of these its axis perpendicular to its plane i over another disc of moment of 'w' about the same axis. The discs is: ω (1±12)w/4 mentum, what is true out of the Linear momentum and displacement are parallel to each other None of these by 10%, isothermally, then its Increases by 9% None of these f the gas, is equal 3/2 kT ½ kT		

(3)

	 B. Oscillate perpendicular to each other and also to the direction of 	D. None of these
_	light What is not must for the propagation of	Electromagnetic waves
- F		C. electric field
F	A. medium	D a charge
_	B. magnetic field The work function of Na is greater the	that of K If both the surfaces are
3	The work function of Na is greater the irradiated with yellow light, then the K. Na surface as compared to the K.E. of the be	E. of the emitted photoelectrons in the he photoelectrons in the K surface will
ł	A. Less	C. More
ŀ		D. Cannot be determined
14	B. Same The Half Life of a radioactive substance one eighth of the radioactivity in a same	is 6 hours. After how much time will ble remain?
ł	A. 12	C. 15
	B. 18	D. 24
15	The Radioactive Decay Law is expresse	ad by
	A. a linear function	C. a quadratic function
	- id-I function	D an exponential function
10	B. a sinusoidal function The electron affinity of chlorine is 349 k	J/mol. What is the correct equation for
16	the formation of chloride?	C. Cl (s) + 349 kJ + e → Cl (s)
	A. Cl (s) + $e^- \rightarrow Cl^-(s) + 349 \text{ kJ}$	D. Cl (g) + 349 kJ + $e^- \rightarrow Cl^-(g)$
	B. $Cl(g) + e^{-} \rightarrow Cl(g) + 349 \text{ kJ}$	D. Cr (g) + 545 http:// ions in their
17	B. $CI(g) \neq e \rightarrow CI(g) + 349 KJ$ Which set of elements has the stronges gaseous state?	
	A. Li, Na, K	C. F, Cl, Br
	B. Be, Mg, Ca	D. O, S, Se
18	Out of these diatomic molecules C2, N2	, O_2 , F_2 which has maximum bond order
	A. C ₂	Cr N ₂
	B. O ₂	D. F ₂ .
19	B. O_2 Which of the following ions would have	e the smallest ionic radius?
	A. 0 ²⁻	C. Cl
	D Ma ²⁺	D. Al ³⁺
20	The geometry and type of hybrid orbita PCl ₃	
	A. Linear, sp	C. Tetrahedral, sp ³
	P Trigonal planar sp ²	D. Pyramidal, sp ³
21	Which statement does not explain why together?	· · · · · · · · · · · · · · · · · · ·
	A. They have the same number of valence electrons	C. They tend to have the same electronegativities
	B. They tend to have similar oxidation	D. They tend to have the same chemical reactivity
22	What is the empirical formula for a co and 82.68% carbon	mpound that contains 17.32% hydroge
	A. C ₆ H	C. CH4
12	B C.H.	D. C ₂ H ₆
23	Uncertainty in position of a particle of uncertainty in velocity (m s ⁻¹) is (Plan	f 20 g in space is 10 ⁴ m. Hence,

. · (4)

1	B. 2.2 x 10 The number of radial nodes of 4s and	2p orbitals are respectively:				
24		C. 0, 3				
	A. 3,0	D. 2,1				
105	B. 2,0	of valence electron of an element are n=4				
25	I=0, m=0 and s=+1/2. The element is :					
	A. V	C: Na				
	В. К	D. Sc				
26	What is the oxidation number of phos	phorus in KH₂PO₄?				
	A. –VI	C. +V				
	B. II	D. +VI				
27	Which one of the following is not a for	m of chemical bonding?				
	A. Covalent bonding	C. Ionic bonding				
	B. Hydrogen bonding	D. Metallic bonding				
28	According to the Bohr model of the ate	om				
	A. Electrons in orbit around nuclei lose	C. Quantum theory is not applicable to				
	energy so slowly	the ultra-structure of an atom.				
	 B. Electrons around a nucleus can 	D. None of these.				
	have only certain particular energies					
	and can only occupy certain specific orbits at particular distances from					
	the nucleus					
29	Calculate the molarity of NaOH in solut	ion managed by discribing the state				
1	water of 250 mL of the solution	ion prepared by dissolving its 2g in				
	A. 0.2 mol L ⁻¹	C. 0.1 mol L ⁻¹				
100	B. 0.4 mol L ⁻¹	D. 0.02 mol L ⁻¹				
30 .	The wave function $\Psi(psi)$	D. 0.02 1101 E				
	A. Represents the particle function	C. A large value of psi squared				
· •	associated with a wave					
- L		indicates the strong possibility of the particle's presence				
E	It is not related to quantum theory					
	and de Broglie waves	D. A small value of pst squared indicates the strong possibility of the				
		Balloe's presence				
1 A	Ma (gooseberries) is the richest source	S D hich vitamin?				
	c vitalinin A	-S- Vitamin C				
B		b van i p				
2 1.4						
2 W	hich of the following elements is a me	tal?				
A.		tal?				
B.	Se	tal? C. Cl				
B.	Se dian Constitution was amended for the	tal? C. Cl				
B. B. A.	Se dian Constitution was amended for the 1950	tal? C. Cl D. Ga first-time in				
B. B. A. B.	Se dian Constitution was amended for the 1950 1952	tal? C. Cl D. Ga first-time in — C. 1951				
B. B. A. B.	Se dian Constitution was amended for the 1950 1952	tal? C. Cl D. Ga first-time in — C. 1951				
B. B. A. B.	Se dian Constitution was amended for the 1950 1952 hich of the following states has the lar Bibar	tal? C. Cl D. Ga first-time in — C. 1951 D. 1953 gest representation in the Lok School				
A. B. A. B. WI A. B.	Se dian Constitution was amended for the 1950 1952 hich of the following states has the lar Bihar Maharashtra	tal? C. Cl D. Ga first time in — C. 1951 D. 1953 gest representation in the Lok Sabha? C. Madhya Pradesh

*	, .	
	A. These are highly polished	C. These are monolithic
	B. The shaft of pillars is tapering in	D. These are parts of architectural
	shape	structures
36	The river most mentioned in early Ved	ic literature is
	A. Sindhu	C. Sarasvati
	B. Sutudri	D. Ganga
37	10 cats caught 10 rats in 10 seconds. I rats in 100 seconds?	low many cats are required to catch 100
	A. 100	C. 10
	B. 20	D. 50
38	Choose the correct alternative to fill in pattern. 4, 9, 13, 22, 35, <u>?</u>	the blank that will continue the same
	A. 57	C., 63
	B. 60	D. 75
39	Which of the following was a recomme	ndation of Hunter's Commission?
	A. Women's education	C. Gradual withdrawal of state support from higher education
	B. New regulation for the organized senates system	D. Introduction of civic education at college and university level
40	Choose the correct meaning of the phr Smell a rat	
•	A. To act unfairly	C. To have reason for suspect
	B. To talk boastfully	D. To discourage
41	Where was the final match of Cricket W	Vorld Cup 2015 held?
	A. Melbourne	C. Sydney
¥.	B. Wellington	D. Auckland
42 .	Who is the Chief Minister of Gujarat?	
	A. Narendra Modi	C. Shri Santosh Kumar Gangwar
_	B. Anandiben Patel	D. K. Chandrashekar Rao
43	What is meaning of underlined idiom in I am afraid he is burning <u>the candle at</u>	
	A. Becoming overgenerous	C. Wasting his money
	B. Overtaxing his energies	D. Losing his objectives
44	What is meaning of underlined idiom in In the organised society of today no in <u>furrow</u> . A. Remain unaffected	the following sentence?
<u></u> ;	B. Survive in isolation	D. Remain non-aligned
45	Ganga is a sacred river:	
40		
	A. The	C. An
	B. A	D. None
4 6	Gandhi ji on charkha every day. A. was spinning	C. had spun
	B. spins	D. spun
47	This isbest player I have ever m	net.
•	A. a	C. Both (A) and (B)
-	B. the	D. None of these
-		ne club to which I am associated.

M N B C It

,	Β. π/4	D. П			
61	If C is the reflection of A(2,4) in x-axis	s and B is the reflection of C in y-axis, then			
	AB] is				
	A. 20	C. 4√5			
	B. 2√5	D. 4			
62	The circles $x^2 + y^2 = 9$ and $x^2 + (y-5)^2 = 9$	= 16			
	A. Touch each other internally	C. Do not intersect			
	B. Touch each other externally	D. Cut orthogonally			
63	The axis of the parabola, 9y ² - 16x -	12y – 57 = 0			
	A. 3y = 2	C. y = 0			
	B. 16x + 61 = 0	D. None of these			
64	The eccentricity of an ellipse, with its directrices is x=4, then the equation	s centre at the origin is 0.5. If one of the of an ellipse is			
	A. $4x^2 + 3y^2 = 12$	C. $3x^2 + 4y^2 = 1$			
	B. $3x^2 + 4y^2 = 12$	D. $4x^2 + 3y^2 = 11$			
65	The locus of the equation, $(x^2+y^2)(x^2+y^2)$	$+y^{2}+x+y) = 0$ is			
	A. A straight line	C. A circle with centre at origin			
	B. A circle through the origin	D. None of these			
66	$ \text{If } \sin^{-1}x + \sin^{-1}(1-x) + \cos^{-1}x = 0$	then x is equal to			
	A. 0	C. 2			
	B. 1	D. None of these			
67	Matrices A and B will be inverse of e	ach other only if			
	A. AB = BA	C. AB = 0, BA = 1			
	B. AB = BA = 0	D. None of these			
68	A simplex in two dimension is	621 · · · · · · · · · · · · · · · · · · ·			
•	A triangle	C. both triangle and rectangle.			
	B. rectangle	D. none of these			
69	$\frac{d^2x}{dy^2}$. equal to				
	A. $\left(\frac{d^2y}{dx^2}\right)^{-1} \left(\frac{dy}{dx}\right)^{-3}$	C. $-\left(\frac{d^2y}{dx^2}\right)\left(\frac{dy}{dx}\right)^{-3}$			
	B. $\left(\frac{d^2y}{dx^2}\right)\left(\frac{dy}{dx}\right)^{-2}$	D. $\left(\frac{d^2y}{dx^2}\right)^{-1}$			
70.	$\int_0^{\pi/2} \sin^2 x dx \text{ equal to}$				
	A: $\frac{\pi}{4}$	$\begin{array}{c} C. \ \frac{\pi}{6} \\ \hline D. \ \pi \end{array}$			
	B. $\frac{\pi}{2}$.3.			
71	Surface endurance limit of gear mat	C. brinell hardness number			
	A yield strength	C. brinell hardness number D. toughness			
-	B: elastic strength				
72 .	The resistance to fatigue of a mater	C ultimate tensile strength			
12 .	A. elastic limit	C. ultimate tensile strength			

Scanned by CamScanner

	B. Young's modulus	D. e	endurance limit

	A. Enthalpy	D. Heat			
	B. Temperature A system contains ideal gas as working	fluid and undergoes a change			
118	A system contains ideal gas as working following isothermal process wherein t	he pressure changes from 20 kPa to 30			
	following isothermal process wherein the kPa and volume changes from 60 m ³ to	40 m ³ . The change in Internal energy			
	ls A. 200 kJ	C. 0			
		D. 300 kJ			
	B. 100 kJ				
119		C. kJ/m ³ -kg			
1	A. kJ/kg-K	D. Kg/kJ-Pa			
4	B. K/kg-kJ	D. Rykers			
120	An irreversible process	C. Exhibits both A and B			
	A. Must pass through a continuous	C. Exhibits both A and B			
1.	series of equilibrium states	D. Exhibits neither A nor B			
	B. Leaves history of the events in the	D. Exhibite field a			
·	surroundings	a carried out to			
121	Tempering is a heat treatment proces	C. Control carbon content of steel			
	A. Increase hardness of annealed stee	tatana atop			
	B. Reduce brittleness of hardened stee	D. Improve wear resistance steel			
122	which is different	t from the outers			
	A. Carburising	0. 0/2			
	- Altheiding	D. Galvanizing			
	at tomperature fin	the range of			
123	$=$ to manufactorial to $\leq t \leq 600^{\circ}$ C				
- in .		D. 1400°c < <i>t</i> < 1530°c			
1.1	B. $600^{\circ}c < t < /30^{\circ}c$				
124	Dielectric strength of a material is	C. Capacity to attract magnetic			
	A. Capacity to withstand stresses	materials			
	without vielding				
	B. Capacity to withstand high voltage	D. None of the above			
12	the state of the s	Sed for maring -			
•		D. None of the above			
	B. Inconel				
12		C. Copper, tin & zinc			
154	A. Copper & zinc				

(12)

.

	B. Copper & tin	D. None of the above
12	7 The product of a cupola is known as	
() i i i i	A. Pig iron	C. Stainless steel
	B. Cast steel	D. Cast iron
128	Ability of a material to absorb energ	y when deformed elastically and to retur
	the same when unloaded is called	
	A. Hardness	C. Toughness
	B. Fatigue strength	D. Resilience
129		
	A. Dead mild steel	C. Eutectoid steel
	B. Medium carbon steel	D. Eutectic steel
130	and a sea for opinigo mast nave i	ligh
	A. Resilience	C. Hardness
	B. Toughness	D. Tensile strength
131	et alle renetting is all example	of orthogonal cutting?
	A. Taper turning	C. Parting off
	B. Drilling	D. None of these
132		g tool is given as "20 – 18 – 12 – 10 – 16 –
	15-01. What is the value of end cutt	ing edge angle of the tool?
	A. 18	C. 10
22	B. 12	D. 16
33	Chip formation in metal machining occ	curs on account of
	A. Snear deformation of work niece	C. Fatigue failure of work piece material
	material ahead of tool nose	at the contact point
	 B. Crack generation in work piece material ahead of tool nose 	D. None of these
34	Continuous chip formation occurs in n	
	A. Cast iron	
	B. Mild steel	C. Both of the above
35	Which one is the correct representatio	D. None of these
Ī	A. $VT^n = C$	n of the tool life equation?
t		C. $\log V - n \log T = C$
36	-1 $\gamma + 1$ $= C$	D. None of these
30 F	The standard material used for estimat A. Cast iron	ion of relative machinability is
E F		C. Stainless stéel
-		D Frank Hill I have been been been been been been been be
" -	Which of the following is not the measure	Ire of tool life?
1	A. Quantity of cutting fluid consumed	C. Volume of production between two
, h	B. Total time of machining	successive grindings
	 Total time of machining between two successive grinding 	DVolume of material removed
8	In which of the following web!	between two successive grindings
1	In which of the following welding proce granules?	sses flux is used in the form of
1	A. SAW	the second se
	B. MIG	C. TIG
19	Which of the following welding process electrodes?	D. None of these
-	electrodes?	es make use of consumable
	re wild welding	C. Laser Welding
	B. TIG welding
